

Warranties:

Mechanical Warranty: FR International warrants all mechanical parts against defects in material and workmanship for a period of one year from the date of the shipment, if the products are properly installed and maintained. While the use of all factory provided fasteners are required to comply with the warranty, these fasteners are not included in the mechanical warranty. FR International does not assume any responsibility for damage due to mishandling, abuse, misuse, accident, improper installation, extreme temperature conditions, or metal deterioration due to exposure to atmospheric conditions beyond the control of Frascio.

Finish Warranty: Frascio products are warranted against manufacturer's defects in standard commercial BHMA finishes for a period of one year from the date of purchase. FR International does not assume any liability or responsibility for damage due to mishandling, abuse, misuse, accident, improper installation, weather or temperature conditions, or finish or metal deterioration due to moisture, chemical cleaners or atmospheric conditions beyond the control of Frascio. Frascio does not accept liability for deterioration of finish caused by chemical cleaners, scratches, nicks or scuffs.

Inox Finish Warranty: Frascio warrants that any components manufactured with the Inox finish (Inox Brass and Inox Chrome) will not tarnish as long as the finish has proper maintenance (routine cleaning with non-chemical/non-abrasive cleaners).

Warranty Limitations: FR International does not assume liability for any labor or other expenses or damages of any kind of nature incurred in connection with the sale, use, or replacement of any defective parts or portions thereof. This warranty shall apply only to the FR International dealer. FR International does not assume nor authorize any other person to assume for it any other liabilities in connection with the sale or use of its products. All FR International warranties on all Frascio products are void if the products are used in combination with other products of any nature other than of Frascio manufacture unless FR International has previously approved such use. All FR International warranties on all Frascio products are void if the products are used for a purpose other than their intended purposes. All FR International warranties are limited to the repair or replacement of the products.

Finish Maintenance:

Brass and Sealed Bronze: Polished, and clear coated brass and bronze will age. Clear coating can break down due to atmospheric conditions, exposure to cleaning products, paints, stains, or even water. Cleaning should be done with only a damp rag (water only). Apply a non-abrasive wax (such as beeswax) to the entire visible trim and polish with a soft cloth. Please follow the wax manufacturer's instructions.

Stainless Steel: Exposure to certain chemical or environmental conditions may build up surface oxidation. This is not a defect in the stainless steel but a reaction on the surface of the finish to the chemical environment which can be removed with a non abrasive stainless steel cleaner.

Cast Bronze Living Patina Finish: The oxidized patina applied to Renaissance bronze products is known as a "living finish" which means it will change with time, touch, climate, etc. Because each product will be exposed to a varying set of conditions, we do not warranty the finish of our patinated bronze products. Cleaning is not recommended as patina can be removed, but if necessary use only a damp rag. If desired, apply a non-abrasive wax (such as beeswax) to the entire visible trim and polish with a soft cloth. Please follow the wax manufacturer's instructions.

Britannium: Britannium material is a soft pewter-like alloy with a living finish, as are pewter and silver. Over time a slight oxidation or tarnish may develop, which can be easily removed. Britannium can be cleaned with a damp rag. Silver polish can be used to restore full luster as desired
